

EARLHAM OUTCOMES

class of 2018

The "career outcome rate," as defined by NACE, is the percentage of graduates who fall into the following categories: employed full time, employed part time, participating in a program of voluntary service, serving in the U.S. Armed Forces, or enrolled in a program of continuing education.

*National averages are for the most recent data available (class of 2017).

KNOWLEDGE RATE

According to NACE, the term "knowledge rate" defines the percent of graduates for which the institution has reasonable and verifiable information concerning the graduates' postgraduation career activities. This information may come directly from the graduates via, for example, a survey method. Relevant data, however, may also be provided by employers, or obtained through other sources (e.g., LinkedIn profiles, other online sources, fellow graduates, or parents).
