

I'm interested in *Biochemistry!* What should I take this year?

Name of program: **Biochemistry**

First year students who are reasonably certain that they will major in this area should take:

	<i>Required/ Recommended</i>	<i>You might also consider...</i>
Fall	CHEM 111: Principles of Chemistry	BIOL 111: Ecological Biology For pre-Health interests, please see the advising page for that area.
Spring	BIOL 112: Cells, Genes, and Inheritance CHEM 221: Organic Chemistry I (prerequisite of a "C" or better in Chem111)	

First year students who are still exploring many options, but are interested in perhaps further study in this area should take:

	<i>Recommended</i>	<i>You might also consider...</i>
Fall	CHEM 111: Principles of Chemistry	BIOL 111: Ecological Biology Taking CHEM 111 in your first semester is the best way to keep your options open for future courses. CHEM 111 is not offered in the Spring semester. BIOL 112 is only offered in the Spring semester.
Spring	BIOL 112: Cells, Genes, and Inheritance CHEM 221: Organic Chemistry I (prerequisite of a "C" or better in Chem111)	

*Are AP/IB courses accepted for credit or advanced placement? **Yes***

If so, what scores qualify, and what placement is granted?

With an AP chemistry score of 4 or 5 or an IB score of 6 or 7, students may be placed into Chem221 without taking Chem111, depending on their past lab experience and future plans. Please contact a chemistry faculty member on or before the first day of class.
