The candidate must be enrolled full-time at an affiliate institution for at least the past two years.

The candidate must achieve the minimum overall and pre-engineering GPA at the affiliate:
- Entry at affiliate prior to fall 2011: 3.0.
- Entry at affiliate in/after fall 2011: 3.30.

A candidate who entered affiliate in fall 2011 must obtain a minimum grade of B (3.0) on the first attempt in each prerequisite course (both foundational and major-specific).

The candidate completes both the foundational coursework and the major-specific coursework at the affiliate institution by the end of the spring semester of application.

All courses and course credit must be noted on the transcript from the affiliate institution. Students must submit official transcripts of all institutions attended.

The candidate must complete the degree and major requirements of the affiliate institution by the end of the spring semester of application.

The candidate must submit three favorable recommendation letters: one each from the Combined Plan liaison, a science instructor and a math instructor.

For students entering the affiliate in/after fall 2011: A candidate whose native language is not English must demonstrate English language proficiency as directed by Columbia.

Applicants who do not meet the above criteria may apply, but admission is not guaranteed and students will be considered in our competitive review process. The requirements of guaranteed admission are used as guidelines for this review process.
DEFINITIONS AND POLICIES

Overall GPA: The overall GPA will be calculated by Columbia using all postsecondary courses that a student has received credit for on their home institution’s transcript. A student must submit all official transcripts to Columbia.

Pre-engineering GPA: The pre-engineering GPA will be calculated by Columbia and consist of all courses listed in the Guide below with the exception of the English Composition, Economics, and 27 non-technical course requirements as well as laboratory courses with separate grades (for consistency across grading systems).

Minimum B grade: This only applies to students who entered the affiliate in fall 2011 or later. The minimum B grade is for all courses listed in the Guide below with the exception of the English Composition, Economics, and 27 non-technical course requirements.

Non-technical coursework: Non-technical credit hours should help a student to learn perspectives and principles of the humanities and social sciences through discussion, debate and writing. Examples of these courses can be found at: http://bulletin.engineering.columbia.edu/b-elective-nontechnical-courses.

Prerequisite coursework: All prerequisite courses must be listed on the home institution’s transcript, regardless if they were taken at another institution. Additionally, all courses not taken at the home institution should be approved by the liaison. We require official transcripts from all institutions attended. Please note the following:

AP/IB or other advanced credit from high school: We will accept any advanced high school credit providing that the credit for this clearly appears on the home institution’s transcript and it is approved by the liaison.

Placement Exams: If a student has taken a placement exam and has placed out of a prerequisite course, the liaison must certify this knowledge and approve the placement and placement should appear on the transcript. Please note that Columbia reserves the right to have a student demonstrate this knowledge and/or retake the course.

Courses at other institutions: If for some reason as approved by the liaison a student cannot take a prerequisite course at the home institution, the student may take the class at a two- or four-year institution, in person and in the United States. The liaison must approve this course and the course must appear on the home institution’s transcript. Students are required to submit all transcripts.

Degree and major requirement completion: Degree requirements are courses, as listed in the home institution’s course catalog, that are required to obtain a degree from the home institution. Major requirements are courses, as listed in the home institution’s course catalog, that are required to complete a major or primary course of study from the home institution. Only one major or primary course of study must be completed for guaranteed admission. Additionally, please note that this requirement does not mean that a student must complete the full number of course credits required for the degree (e.g., the full 128 credits).

Also, 3-2 candidates should not that they cannot receive their degree from the home institution until the two years at Columbia are successfully completed.

Instructor recommendations: The science recommendation letter should come from an instructor of an academic course in the sciences. The mathematics recommendation letter should come from an instructor of an academic course in mathematics, such as a prerequisite course. It should not be a leader of a discussion section or laboratory section.

English language proficiency: This only applies to students who entered the affiliate in fall 2011 or later. If English is not the native language, students should review our website to see the most up-to-date Columbia policy for English language proficiency.
2014-15 PRE-ENGINEERING PREREQUISITE COURSES

We require each Combined Plan affiliate to develop a curriculum guide that outlines the specific courses at that institution which fulfill our prerequisites; those courses are listed in this guide. Liaisons at each school are responsible for determining which classes fulfill Columbia pre-engineering prerequisite courses.

In order to be considered for guaranteed admission, students must successfully complete the equivalents of the following Columbia courses (code numbers given in parentheses) at his/her home institution. Please see the Course Descriptions document for course descriptions. Students should touch base with the liaison(s) at his/her school in order to determine which classes fulfill these Columbia prerequisite courses. Students should also speak with his/her liaison(s) about other ways to fulfill prerequisites if the institution does not offer a required course listed in this guide.

We encourage you to review the Columbia Engineering Bulletin online at http://bulletin.engineering.columbia.edu to learn more about each individual degree program.

FOUNDATION COURSES REQUIRED OF ALL MAJORS:

i. MATHEMATICS
   - The full sequence of Calculus I, II, III, IV (V1101, V1102, V1201, V1202).
   - Math 180 (Calc A), 280 (Calc B), 320 (Diff Equations), 350 (Multivariable)

ii. PHYSICS
    - Mechanics and Thermodynamics (C1401) Physics 125, 235 (Analytical Physics I and II)
    - Electricity, Magnetism, and Optics (C1402)

iii. CHEMISTRY
    - General Chemistry I (C1403) Chemistry 111 (General Chemistry)
    - Please see individual programs below for details. Some programs require an additional second semester of General Chemistry (C1404) or have possible substitutions.

iv. LAB REQUIREMENT
    - Either a one-semester physics lab or one-semester chemistry lab is generally required and may be taken in conjunction with the introductory Physics and/or Chemistry courses listed above.

v. COMPUTER SCIENCE
    - CS128, taught in C++
    - Introduction to computer science and programming in C++, JAVA, Python or MATLAB (W1004, W1005, W1007 or ENGI 1006)
    - Some majors require a specific programming language (see requirements for majors below).

vi. HUMANITIES AND SOCIAL SCIENCES
    - ECON 100
    - Principles of Economics (ECON W1105)
    - English Composition (ENGL C1010 University Writing)
    - 27 non-technical credit hours. These courses are often fulfilled through major and degree requirements; students should speak with their liaison(s) to ensure they have fulfilled this requirement.
REQUIRED MAJOR SPECIFIC COURSES
(Notes in *italics* clarify requirements.)

**APPLIED MATHEMATICS or APPLIED PHYSICS**

**MATHMATICS**
- Ordinary Differential Equations (E1210)
- Math 320, included in foundation courses

**PHYSICS**
- Classical and Quantum Waves (C1403)
- Physics Lab (C1493/4)
- Phys 345 (Modern Physics)
- lab included in 125/235

**CHEMISTRY / BIOLOGY** (Choose one course listed below. Chemistry/Biology labs are not required.)
- General Chemistry I (C1403)
- Environmental Biology I: Elements to Organisms (EEEB W2001)
- Introduction to Molecular and Cellular Biology (C2005)
- Chem 111, included in foundation courses
- Bio 111 (Eco Bio)
- Bio 112 (Cells, Genes and Inheritance)

**BIOMEDICAL ENGINEERING (ALL TRACKS)**

**MATHMATICS**
- Introduction to applied mathematics – Ordinary Differential Equations & Linear Algebra (APMA E2101).
  *Students who take an ODE course must also take a Linear Algebra course.*
- Math 310 (Linear Algebra)

**PHYSICS**
- Classical and Quantum Waves (C1403)
  - Phys 345 (Modern Physics)

**CHEMISTRY**
- General Chemistry II (C1404)
- General Chemistry Lab (C1500)
- Chem 331 (Equilibrium and Analysis)
  - lab included in Chem 111

**ELECTRICAL ENGINEERING**
- Introduction to Electrical Engineering (ELEN E1201) [*may be taken the summer before entering or while at Columbia*]

**COMPUTER SCIENCE**
*Introduction to Computer Science and Programming in Python (ENGI 1006) preferred*

- CS128 (in foundation courses) is taught in C++, contact liaison for options for Python experience
CHEMICAL ENGINEERING

MATHEMATICS (choose one course listed below)
- Ordinary Differential Equations (E1210)
- Introduction to applied mathematics – Ordinary Differential Equations & Linear Algebra (APMA E2101)
  Math 320 (included in foundation courses)
- Math 310 (Linear Algebra)

PHYSICS
- Physics Lab (C1493/4)
  (included in 125/235, part of foundation courses)

CHEMISTRY
- General Chemistry II (C1404)
- General Chemistry Lab (C1500)
- Organic Chemistry I (C3443)
- Organic Chemistry Lab (C3543) [may be taken the summer before entering or while at Columbia]
  Chem 331 (Equilibrium and Analysis)
  Chem 221 (Organic I, includes lab)
  (included in Chem 111, foundation courses)

CIVIL ENGINEERING

MATHEMATICS
- Introduction to applied mathematics – Ordinary Differential Equations & Linear Algebra (APMA E2101).
  Students who take an ODE course must also take a Linear Algebra course.
  Math 310 (Linear Algebra)

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (C1493/4)
- General Chemistry Lab (C1500)
  both are included in foundation courses

ENGINEERING MECHANICS
- Mechanics (ENME E3105) [may be taken the summer before entering or while at Columbia]

COMPUTER SCIENCE
  Introduction to Computer Science and Programming in MATLAB (COMS W1005) preferred
  CS128 (in foundation courses) is taught in C++, contact liaison for options for MATLAB experience

COMPUTER ENGINEERING

MATHEMATICS
- Introduction to applied mathematics – Ordinary Differential Equations & Linear Algebra (APMA E2101).
  Students who take an ODE course must also take a Linear Algebra course.
  Math 310, Linear Algebra

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (C1493/4)
- General Chemistry Lab (C1500)
  both are included in foundation courses

COMPUTER SCIENCE (Computer Programming in JAVA is required.)
- Discrete Mathematics (COMS W3203) Math 190, Discrete Mathematics

ELECTRICAL ENGINEERING
- Introduction to Electrical Engineering (ELEN E1201)
  Students who do not take or receive transfer credit for ELEN E1201 need to take an additional technical elective course while at Columbia
**COMPUTER SCIENCE**

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (C1493/4)
- General Chemistry Lab (C1500)  
  both are included in foundation courses

COMPUTER SCIENCE (Computer Programming in JAVA is required.)
- Data Structures and Algorithms (COMS W3134) CS 256, Advanced Programming
- Discrete Mathematics (COMS W3203) both 128 and 256 are taught at EC in C++, you will have to learn JAVA on your own

**EARTH AND ENVIRONMENTAL ENGINEERING**

**MATHEMATICS**
- Introduction to applied mathematics – Ordinary Differential Equations & Linear Algebra (APMA E2101). *Students who take an ODE course must also take a Linear Algebra course.* Math 310 (Linear Algebra)
- Introduction to Probability and Statistics (W3600) [may be taken while at Columbia.] Math 300 (Mathematical Statistics)

**CHEMISTRY**
- General Chemistry II (C1404) Chem 331 (Equilibrium and Analysis, with lab)
- General Chemistry Lab (C1500)

**OTHER SCIENCE ELECTIVE (choose one course listed below)**
- Organic Chemistry (CHEM C3443) Chem 221 (Organic I)
- Classical & quantum waves (PHYS C1403) Phys 345 (Modern Physics)
- Introduction to Molecular and Cellular Biology (BIOL C2005) Bio 112 (CGI)

**EARTH AND ENVIRONMENTAL SCIENCES (choose one course listed below)**
- Advanced General Geology (EESC W4001) [may be taken while at Columbia.] Geo 201 (Environmental Geo, similar to V2100)
- The Climate System (EESC V2100) [may be taken while at Columbia.] Geo 211 (Physical Geology, similar to V2200)
- The Solid Earth System (EESC V2200) [may be taken while at Columbia.]

**EARTH AND ENVIRONMENTAL ENGINEERING**
- Better Planet By Design (EAAE E2100) [may be taken at Columbia]

**ELECTRICAL ENGINEERING**

**MATHEMATICS**
- Introduction to applied mathematics – Ordinary Differential Equations & Linear Algebra (APMA E2101). *Students who take an ODE course must also take a Linear Algebra course.* Math 310 (Linear Algebra)

**PHYSICS**
- Classical and Quantum Waves (C1403) Phys 345 (Modern Physics)
- Physics Lab (C1493/4) labs included in 125/235

**COMPUTER SCIENCE**
*Sufficient knowledge of computer programming is needed in order to take Data Structures (COMS W3134 or W3136) covered by CS128 in foundation courses*

**ELECTRICAL ENGINEERING**
- Introduction to Electrical Engineering (ELEN E1201) [may be taken the summer before entering or while at Columbia]
IEOR: ENGINEERING MANAGEMENT SYSTEMS

MATHEMATICS (choose one course listed below)
- Linear Algebra (MATH V2010 or APAM E3101) Math 310 (Linear Algebra)

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (PHYS C1493/4) covered in foundation courses
- General Chemistry Lab (CHEM C1500)

COMPUTER SCIENCE (choose one set of courses below)
- Introduction to Computing for Engineers and Applied Scientists (ENGI E1006) CS 128
  CS 256 (both in C++)
- Data Structures in C/C++ (W3136) -or-
  Introduction to Computer Programming in JAVA (COMS W1004)
  Data Structures in JAVA (COMS W3134)

The Department strongly recommends JAVA over C.

ECONOMICS
- Introduction to Accounting and Finance (IEOR E2261) Mgmt 200 (Financial Accounting)

PROBABILITY AND STATISTICS
- Introduction to Probability and Statistics (SIEO W3600) Math 300 (Mathematical Statistics)
  -or-
  Probability (IEOR E3658)
  Applied Statistical Models in Operations Research (IEOR E4307) Statistical Inference (STAT W3107)
  Please note that the statistics must have calculus as a prerequisite. The Department strongly suggests taking two separate courses: one in Probability and one in Statistics.

IEOR: FINANCIAL ENGINEERING
Students cannot apply directly to IEOR: Financial Engineering because this concentration in Operations Research requires an application after one semester of study at Columbia. Entrance into this program is extremely competitive. Students who are interested in this major should consider the Operations Research, Industrial Engineering or Engineering Management Systems which are housed in the same department (IEOR) as Financial Engineering.
IEOR: INDUSTRIAL ENGINEERING

MATHMATICS (choose one course listed below)
- Linear Algebra (MATH V2010 or APAM E3101) Math 310 (Linear Algebra)

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (PHYS C1493/4) included in foundation courses
- General Chemistry Lab (CHEM C1500)

COMPUTER SCIENCE (choose one set of courses below)
- Introduction to Computing for Engineers and Applied Scientists (ENGI E1006)
- Data Structures in C/C++ (W3136) CS 128
  -or-
- Introduction to Computer Programming in JAVA (COMS W1004) CS 256 (both in C++)
- Data Structures in JAVA (COMS W3134)

The Department strongly recommends JAVA over C.

ECONOMICS
- Introduction to Accounting and Finance (IEOR E2261) Mgmt 200 (Financial Accounting)

PROBABILITY AND STATISTICS
- Introduction to Probability and Statistics (SIEO W3600) Math 300 (Mathematical Statistics)
  -or-
- Probability (IEOR E3658)
  Please note that the statistics must have calculus as a prerequisite. The Department strongly suggests taking two separate courses: one in Probability and one in Statistics.
IEOR: OPERATIONS RESEARCH

MATHEMATICS
- Linear Algebra (MATH V2010 or APAM E3101) Math 310 (Linear Algebra) included in foundation courses

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (PHYS C1493/4) included in foundation courses
- General Chemistry Lab (CHEM C1500) included in foundation courses

COMPUTER SCIENCE (choose one set of courses below)
- Introduction to Computing for Engineers and Applied Scientists (ENGI E1006)
- Data Structures in C/C++ (W3136)
- or-
- Introduction to Computer Programming in JAVA (COMS W1004)
- Data Structures in JAVA (COMS W3134)

The Department strongly recommends JAVA over C.

ECONOMICS
- Introduction to Accounting and Finance (IEOR E2261) Mgmt 200 (Financial Accounting)

PROBABILITY AND STATISTICS
- Introduction to Probability and Statistics (SIEO W3600) Math 300 (Mathematical Statistics)
- or-
- Probability (IEOR E3658)

Please note that the statistics must have calculus as a prerequisite. The Department strongly suggests taking two separate courses: one in Probability and one in Statistics.

ENGINEERING MECHANICS

MATHEMATICS
- Ordinary Differential Equations (E1210) included in foundation courses

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (C1493/4) included in foundation courses
- General Chemistry Lab (C1500) included in foundation courses

ENGINEERING MECHANICS
- Mechanics (ENME E3105) [may be taken the summer before entering or while at Columbia]
MATERIALS SCIENCE AND ENGINEERING

MATHEMATICS
- Ordinary Differential Equations (E1210) included in foundation courses

PHYSICS
- Classical and Quantum Waves (C1403)
- Physics Lab (C1493/4) Phys 345 (Modern Physics)
labs included in 125/235

CHEMISTRY
- General Chemistry II (C1404)
- General Chemistry Lab (C1500)

MECHANICAL ENGINEERING

MATHEMATICS
- Introduction to applied mathematics – Ordinary Differential Equations & Linear Algebra (APMA E2101). Students who take an ODE course must also take a Linear Algebra course. Math 310 (Linear Algebra)

PHYSICS/BIOLOGY (choose one course listed below)
- Classical and Quantum Waves (PHYS C1403) Phys 345 (Modern Physics)
- Environmental Biology I: Elements to Organisms (EEEB W2001) Bio 111 (EcoBio)
- Introduction to Molecular and Cellular Biology (C2005) Bio 112 (CGI)

PHYSICS/CHEMISTRY LAB (choose one course listed below)
- Physics Lab (C1493/4) included in foundation courses
- General Chemistry Lab (C1500)

ENGINEERING MECHANICS
- Mechanics (ENME E3105) [may be taken while at Columbia]

ELECTRICAL ENGINEERING
- Intro. to Electrical Engineering (ELEN E1201) or equivalent [may be taken the summer before entering or while at Columbia] Phys 350 (Electronics and Instrumentation) may be equivalent
